

ESET NOD32 – Antivirus & Antispam - is famed for its 'lightweight, quick, ruthless, accurate' antiviral characteristics in the industry. It can provide real time protection against various known and unknown viruses, spywares, root kits and other types of malwares, protecting you in a proactive way and warding off all potential threats. It is absolutely reliable!

ESET NOD32 emerges as the industry leader with all the awards garnered! And ESET will continue to introduce more excellent software to meet your diverse needs. ESET NOD 32 Antivirus use advanced heuristics, general signatures and emulation capable of countering even the most sophisticated zero-day attacks.

Additionally ESET NOD32 Antivirus Business Edition features ESET Remote Administrator to allow easy updating and centralized administration of all the systems in your local and wide area networks. With its ultra-light system footprint, and stellar scanning speeds, ESET NOD 32 ensures the smooth performance of workstations and allows your employees to remain productive, while the superior detection provides comprehensive protection for your whole network.

ESET Smart Security Business Edition - Antivirus, Antispam, Antispyware & Personal Firewall – is a deeply integrated solution providing endpoint security for businesses of all sizes. ESET Smart Security brings the speed and precision of ESET NOD32 Antivirus and its powerful Threat Sense® engine and combines it with custom engineered firewall and anti spam solutions - constantly vigilant in keeping computers safe from malware and other internet threats.

ESET Smart Security Business Edition features the ESET Remote Administrator 3 to ensure smooth updating and centralized management in networked environments. ESET Remote Administrator allows fast setup and eases administration of all the machines in a local and wide area network. ESET Smart Security Business Edition ensures optimal performance of the systems and networks and reduces bandwidth consumption.

The four main modules (Antivirus, Antispyware, Personal Firewall and Anti-Spam) were optimized to provide even better integrated protection by maintaining a high level of performance and speed simultaneously.
